# Resurrection

## Share the Good News

Early in the morning, two women named Mary went to the tomb where Jesus was had been laid. *(Stretch your body.)*

The women were probably there to prepare Jesus' body to be buried.

But, when they got there, a big earthquake shook the earth. *(Stomp your feet.)*

Then an angel appeared. He rolled away the big stone and sat on it. *(Sit down.)*

The angel was glowing so brightly! *(Stand up and cover your eyes.)*

The guards were scared and shaking, and then they fell down like they were dead. *(Shake your body, and then fall down.)*

The angel told the women that Jesus was not there and that he was raised and was with God. *(Lift your hands in the air.)*

The angel invited them to see the place where Jesus had been laid. *(Take 3 steps forward.)*

Then the angel told the women to go and tell the other disciples what they had seen and heard. *(Run in place.)*

But on their way, they saw Jesus. They stopped and worshipped him. *(Get down on your knees and bow down.)*

## Butterflies

Read these facts about butterflies.

- Butterflies are insects.
- A butterfly's life cycle is made up of four parts: egg, larva (caterpillar), pupa (chrysalis), and adult (butterfly).
- A fully grown caterpillar attaches itself to a twig or leaf before shedding its outside layer of skin to show the hard skin underneath, which is known as a chrysalis. A butterfly will come out of the chrysalis.
- Butterflies have four wings.
- Butterflies often have brightly colored wings with patterns made up of tiny scales.
- Butterflies flap their wings about five times every second.
- Butterflies can see the colors green, red, and yellow.
- Most butterflies feed on nectar from flowers.
- Butterflies can taste through their feet.
- Scientists think there are between 15,000 and 20,000 different species of butterfly.
- The fastest a butterfly can fly is twelve miles per hour.

## 3-D Egg

Follow the instructions to create a 3-D paper egg.

### Instructions

1. Cut out all 5 egg shapes.
2. Fold each egg in half, with the solid color inside.
3. Glue one back side of one of the eggs to one back side of another egg.
4. Then glue one back side of an egg to the free side of one of the two attached eggs.
5. Continue gluing eggs to the free sides of the eggs you've already glued together until all the eggs are attached.
